Frontend Developer, Jan 2022 – Present (2.7+ years)

- Developed and maintained complex web applications using JavaScript, Angular and React, ensuring code quality, performance, accessibility and maintainability.

PROJECTS

Project 1: Bilddit Merchant and Admin Application

Description: Merchant and order management system to enhance the instant delivery service of an e-commerce store. This project involved order allocation to merchants, real-time order-tracking, merchant onboarding, order management, product mapping and payouts module.

Project 2: Perfumania

Description: Developed user-friendly e-commerce platform for a fragrance retailer, focusing on optimizing product details, collections, and brand pages. I streamlined the shopping cart experience to improve conversion rates, and ensured ADA compliance, SEO best practices to increase the platform's visibility in search results.
